

		VanSchedule Test Cases		
Test #	Test Description	Reason for Test	Expected Outcome	Pass/Fail
T1	Schedule a trip to the park at 12 on 12/24 and a trip to the bank at 13 on 12/30	Proves the scheduler can handle multiple days	Both schedules will show up when I request them in the saved schedule printer and on the receipt	Pass
T2	Enter the "view all van schedules" menu and "display all vans scheduled for today" sub-menu. Ensure that all listed vans have 5 stops scheduled	Makes sure each van has the correct amount of stops listed	Every van will have 5 stops including their break	Pass
T3	Attempt to schedule a van outside of posted hours	Ensures a user can't book a van when they're off work	The time error checker will inform the user (me) that they are unable to do this action	Pass
T4	schedule a van when it's on break	Ensures the user can't book a van while they're busy	The time error checker will inform the user (me) that they are unable to do this action	Pass
T5	Schedule a van in a time range that doesn't actually exist	Show that the system error handler won't allow impossible inputs	Program will not allow the user to enter a time range that doesn't exist	Pass
